### **Green Economics Institute**

Reclaiming Economics for all people everywhere, other species, nature, planet and its systems

## Green Economics Institute

# 6<sup>th</sup> Annual Green Economics Conference at Oxford University

Mansfield College, University of Oxford

July 28<sup>th</sup> 29<sup>th</sup> 30<sup>th</sup> 2011

Green Economics. A unique and timely Economics for the Anthropocene?

Sovereign Wealth Funds and the Sovereign Debt Crisis. The coming of Democracy and the Age of Spring. Examining how the world is changing.

#### Achieving social and environmental justice.

The Changed World Economics and Political Order Competing powerful Funds, PIGGS, Civets, BRICS, recession,

Austerity, Food, Blood and Minerals. The Scramble for Africa's Resources and water. The IMF, Green Investment, Nation States.

The economics needs, rights and impacts and responsibilities of everyone and everything on the planet.

## **Call for Papers**

Share green ideas and methodologies with international experts in the field, with academics and green business leaders. Presentations, Panel Discussions, keynote speeches, from MPs, Nobel Prize winners, Economics Professors, engineers, Business Directors, Campaigners and many others.

This unique style of conference promotes a participatory "open source" ways of working with many new and exciting speakers as we create and develop the Discipline of Green Economics together at the conference!

### **Rationale For The Conference**

Reducing and preventing poverty, halting climate change, ending mass extinction of species, reclaiming economics for us all.

Sharing the planet with each other and other species!

**Global Environmental Change and Economics?** The latest science –People are a product of sharing the world since 32,000 BC proactively with other species! Can we afford the 6<sup>th</sup> ever **mass extinction** of species?

Hot News: Anthropocene- v Holocene? How much are we influencing and shaping the earth?

**The Global Shift eastward:** How and why it has happened. Linking it to those countries undergoing revolutionary change in their political institutions. We unlock the mysteries of changing and shifting power elites. We embrace the people's bid for Human Rights, and Democracy, We Reclaim Economics and access to progressive economics and politics for all people everywhere, especially women (at the forefront of revolutions), Ending the current land grab

**Green Economics** a new discipline or school, reforms mainstream discourse and widens the scope, reworking obsolete theory and practice, fits economics into today's requirements and matches it to the coming century. Our global network for equality, equity and democracy is being taken up and is active everywhere.

Adressing power inequality issues and the fact that many larger economies- eg Walmart is bigger than many countries. The power of nation states and their governments to resist and to impose legal and institutitional governance in the face of extremely powerful sovereign wealth funds and sovereign debt and privatisation of global commons of land, water, sea and energy resources.

Wither the nation state, education, health care, pensions, and well being in the face of this resource onslaught- where does it leave the economy- is it privatised without democratic agreement?

Who really selects the government -in the face of energy companies' massive power to sponsor governments- many governments around the world have become the acceptable face of the oil companies, how can we combat this growing tendency- and create democratic and other

governments who rule by the people, for the people?

Creating a vibrant. Innovative green economy with environmental sustainability and protection. Combating the culture of consumption, and over shoot as a solution to the global economics downturn. What is the real role of eco technology- how do we harness its better aspects and prevent it becoming an excuse for yet more consumption of the world's resources? Changing of lifestyles and its imperative and the cradle to cradle full life cycle of products and services.

SWOT and other analyses of this changed new world economic, social, legal, and institutional frameworks.

Finite, steady, natural resources, global climate change and intergenerational justice – how to nuture the planets resources and natural bounty.

We bring together campaigners, legal professionals, policy-makers, interns, Professors, Nobel Prize winners, shakers, movers, philosophers, innovators, scientists, economists, geographers, psychologists, scholars, practitioners, government agencies, multilateral organizations, and NGOs.

#### **Green Economics Practice:**

Green Public and Private Sector Procurement, Whole life costing, cradle to cradle, Green IT, Manufacturing, Transport, trains cycling

Climate Science, Renewable Alternative energy Green Engineering, Solar Wind, SMART GRID, Feed in Tariffs, zero and lower carbon pricing and storage, *Our delegation to COP15, 16, 17, Kyoto, climate UNFCC* Conferences Reduce, Recycling, Reusing, Repair, Avoidance, pollution/ Oil, Contraction and Convergence and Lower Growth, Degrowth, prosperity without growth, population,.

Global economics background, Trading environment business, public sector, + cuts

#### Themes and subject coverage

**Intra and Intergenerational Equity,** Older people and pensions, Younger people, unemployment and the lost generation. Human and economics, rights, needs, impacts, responsibilities.

#### Reports back on our work in:

**The Green Built Environment** The economics of the rural urban fringe, RELU, Greening of Cities, Green Buildings, Transport- Humans; an urban species for the first time in history, Civilisation – what does it mean in the 21<sup>st</sup> century and beyond?

**Books and Journals Launches**: Plan for the Planet: The Green Economics Reader Series: Economics of Abundance

**Gender perspectives**: Our activity Green New Deal, Panel with Green European Foundation.

**Features:** Eastern Europe, China, Baltics, Ireland, Estonia, Egypt, Balkans, Our work in Africa – Nigeria, Ethiopia South Africa

**Speakers** We encourage as many as possible at this event: so all speakers are asked to contribute to the event by paying the relevant fee. They are all invited to submit to publish in the proceedings.

#### **Introduction to the Conference**

This Conference will follow the tradition of the Green Economics Conferences which are the world's leading Conference series in Green Economics. Internationally renowned composite, multidisciplinary, scientists, economists, campaigners, Policy makers and Directors, Professors, Social scientists and Researchers from all over the globe will present their frontier research findings and to keep up to date with latest achievements and developments in this very fast moving, leading and topical field.

This conference is designed to present the important research and findings of economics by doing and also theoretical ideas about what reforms Green Economics can offer the mainstream and to allow time to think about the issues more fully.

The conference will also debate the current economics downturn.

Green Economics views the current downturn as a clash between ecology and economy and argues that the commodity instability is a symptom the exhaustion of natural resources. The markets are correctly reflecting that and are indicating that traditional economics instruments and derivatives are however no longer any use, and new methods of creating a natural economics of abundance need to be urgently developed.

The world has changed and Green Economics is an economics which is comfortable with long termismequity, climate issues and biodiversity costs and poverty prevention, and which has been waiting to take the mantle and that time has now arrived!

We look forward to welcoming you to Mansfield College, Oxford University a traditional beautiful typical Oxford University College complete with croquet lawn and quad at the front and stunning chapel and Dinning Hall both of which we will be using for the conference, and the Oxford University Club, a lovely new bright and airy building overlooking the cricket green in one of the most beautiful cities in the world with outstanding, exciting and famous atmospheric Conference facilities excellent travel connections and accommodation.

# Programme Schedule: 28th-30th July 2011

19.00-23.00 Wednesday 27th July 2011 Mansfield College Oxford University Welcome Evening	Summer Evening Welcome Party  Interns evening, Setting the scene, Introductions, Summer Buffet Dinner Croquet on Quad Lawn
10.00-23.00 Thursday 28th July 2011 Mansfield College Oxford University	Main Conference Conference speeches and Keynote Speeches, Plenaries Gala Dinner at Vaults Restaurant Speeches
10.00-23.00 Friday 29th July 2011 Mansfield College Oxford University	Conference speeches and Keynote speeches and Plenaries, Awards Ceremony in Mansfield College, Oxford University Dinner in University Dinning Hall
10.00-23.00 Saturday 30th July 2011 Oxford University	Plenary sessions, Keynote speeches, Workshops and speeches and Networking Formal Dinner Party

## Creating a global wave of change!

To find out more and to reserve a place- please email

greeneconomicsevents@yahoo.co.uk greeneconomicsinstitute@yahoo.com

#### **PAPERS - PROCEEDINGS**

All paid up participants will receive a proceedings document on arrival at the conference. This timetable is for guidance only and a detailed timetable will be issued shortly.

All speakers and participants are invited to contribute to the proceedings. Please provide between 4 and 8 pages A4 -1600 - 2500 words please. References to be used where necessary and **no footnotes.** Please send the article in .doc or .odt formats. Please use Arial 11 point with 12 point headings. Send a 5 line biography about you and your professional interests and your title, institution and the title of the paper and your telephone and email contact details.

All proceedings will be considered for inclusion or submission to our high profile global academic and or political journals whose editors are Kristina Jociute, Miriam Kennet and Michele S.Gale d'Oliveira. Papers will be considered for inclusion in our books series, The Green Economics Readers © books and our Green Economics books series with Ashgate Academic Press and Gower Management Publishers.

Photo: our symposium in May 2011, about women's equal pay and poverty in the Age of Austerity

## **Speakers**

The Call for Speakers and Papers is now open. Please email us as soon as possible to ensure you reserve a place greeneconomicsevents@yahoo.co.uk

We do still have some still open so email as soon as possible!

## Speakers and sessions (These are still open- please email if you would like to speak)
